

KD80s ±2kN - ±5kN -10kN

### Description

The force sensor KD80s is used for tensile and compressive force measurements and for weighing.

The areas of application are e.g. wire rope measurements, test beds, overload securing for lifting tools, process controllers as well as weighing scales.

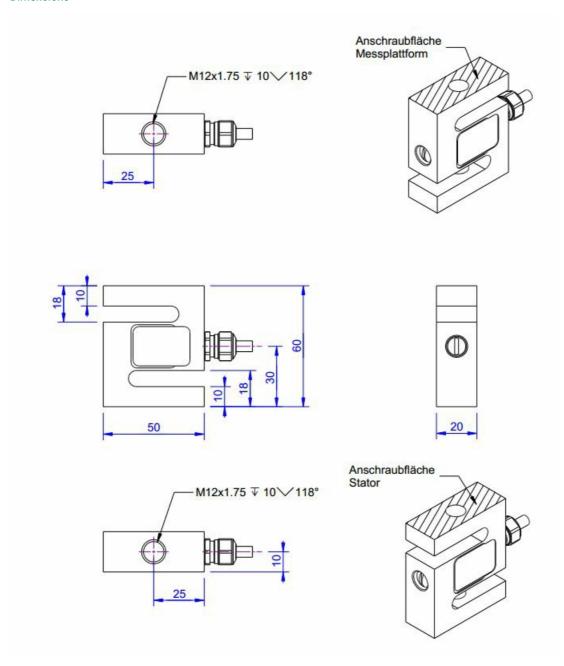

The force sensor KD80s for the standard temperature range will be delivered with cable Unitronic FD CP Plus 4x0,14.

The force sensor KD80s HT is used for the maximum operating temperature of 150°C. For this temperature range of 150°C the sensor will be delivered with 6-wire high temperature resistant cable ALMI HAFL-C MOD. SO 6x0,15mm².

The KD80s sensors have accuracy class of 0,05%. The environmental protection is IP65.
